Introduction

Healthcare providers and EMS systems throughout the region implemented the web-based program, EMResource, in order to provide local government and healthcare professionals a method to receive real-time information on the current status of the emergency medical and health system resources. EMResource features include: hospital emergency department status information, Trauma Center information, patient tracking, hospital bed tracking, and event notifications. EMResource was developed in response to the need for timely EMS and hospital resource information, and is a user friendly application that requires only an internet connection and a computer running a current web browser to operate.

System maintenance is limited to the EMResource server, freeing local users from having to invest time in updating the system. EMResource provides the hospitals a valuable resource in providing supportive and timely information on the welfare of healthcare facilities and assets throughout the region. Hospitals and other healthcare providers update their facility or resource statuses at regular intervals, enabling local government and other emergency personnel to quickly assess the status of the local healthcare system, as well as neighboring regions.

During an emergency or disaster situation, there is a need for timely and concise up-to-date information on the availability and capability of local emergency response resources. Rapid information pertaining to local and regional healthcare resources will ultimately reduce overall mortality and morbidity.

EMResource offers hospitals a conduit to communicate with other healthcare facilities, as well as other supportive emergency operation services or providers. Logistical decisions also benefit greatly by utilizing information being relayed by the EMResource web-based tool. Exchanging data during an event involving multiple patients is provided through EMResource in regard to hospital bed availability, status, and capacity; enabling local government agencies to respond with greater efficiency to emergencies and disasters.

EMResource is used as an information system for day-to-day routine EMS services, as well as specialized emergency medical operations, such as mass casualty incidents, county and region-wide drills, healthcare facility evacuations, and other major EMS and Public Health related functions.

In summary, this system has effectively demonstrated its ability to save valuable time when faced with critical EMS system and Public Health coordination, as well as providing day-to-day communications among healthcare providers throughout the region.

System Requirements

In order to utilize the EMResource tool, you will first need access to the internet by way of a computer. The suggested system configuration set forth by EMResource is as follows:

Hardware:

Minimum Configuration

100 MHz processor

32 MB of RAM

Internet connection hardware:
Network connection or 28.8K modem

Color monitor with 800x600 dpi
minimum resolution

Sound card with speakers

Mouse and keyboard

Recommended Configuration

200 MHz

128 MB of RAM

High-speed Internet connection:
DSL, T1 or 56K V.90 modem

Color monitor with 1024x768 dpi
resolution

Sound card with speakers

Mouse and keyboard

Software:

Minimum Configuration

Windows, Unix or Mac OS

Internet Explorer 5.5, Netscape 6 or Mozilla 1.0

Adobe Reader

Recommended Configuration

Windows, Unix or Mac OS

Internet Explorer 6.0 or newer

Adobe Reader

Communications:

- Requires Internet Connection to www.emsystem.com
- Dedicated 24x7 Internet Connection (this must be a dedicated, uninterrupted connection). Users must be connected to EMResource to view up to date information.

Sound Settings:

- Your browser needs to be set to play sounds from web pages (default value on most browsers will already include this)
- Real Player is NOT supported by EMResource and has not worked well in the past. EMResource suggests using Microsoft Windows media player to play sounds on your computer.
- The volume on your computer must set to an audible level to hear EMResource sounds. If the volume is not turned up, you will NOT hear EMResource sounds.

Special Considerations for Network Connections:

- In addition to the normal network connection, it is recommended that all users have the ability to use a modem and dial-up networking to access the Internet via an independent ISP in the event of a Network outage. For security purposes make sure this modem is NOT set to auto-answer.
- When your access to EMResource is running behind a firewall, the PC must have the ability to access www.emsystem.com, www1.emsystem.com, [www2.](http://www2.emsystem.com), [www3.](http://www3.emsystem.com), [www4.](http://www4.emsystem.com), etc. or www*.emsystem.com.

Starting EMResource

In order to initiate the use of the EMResource web-based tool, you must first navigate to the EMResource home page at: <http://www.emsystem.com>.

Version 3 will direct you to the corporate webpage when you first access EMResource using the www.emsystem.com address. If you are not automatically routed to the login page, you may click on the EMResource Link located on the website, which will redirect you to the login page.

Be sure to note that the initial URL utilizes only “www” and not “www2” or “www3”. EMResource utilizes a redundant system of servers in order to manage the load during periods of high demand. When you first arrive at the EMResource website, your browser is automatically redirected to one of the available servers (e.g. www1, www2, www3, etc.). If you plan to create a bookmark for easy access, be sure that it is directed only to the primary address at <http://www.emsystem.com> and not one of the redundant server sites containing a number (i.e. www1, www2, etc.).

(note: EMResource may take one of the redundant servers down from time to time to perform maintenance, which would cause the bookmark to become invalid.)

Once your web browser is showing the EMResource login screen, you may log in to the system. If you do not have a login, or your login does not allow access to the system, please contact your local EMResource administrator.

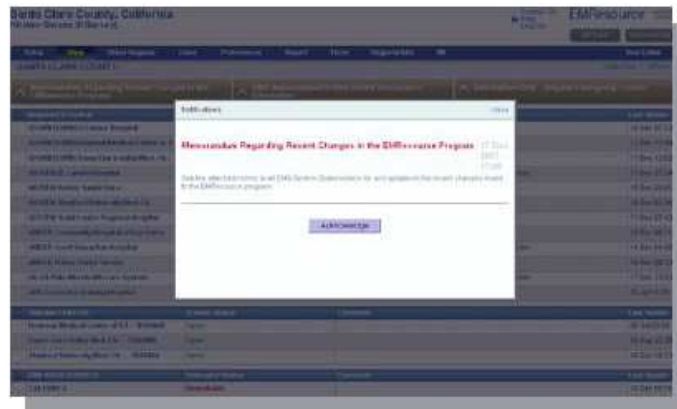

To log into the system:

1. Type in your user name (Note: User names are case sensitive.)
2. Type in your password (Note: Passwords are case sensitive.)
3. Click on the “Login” button.
4. You will now be taken to the default screen on the application page.

View	Other Regions	Event	Preferences	Form	Report	Regional Info	Instant Message	User Links
Region Default								print refresh
- Trauma Level II		Hospital Status		Comment			Last Update

Oroville Hospital, L- III		Open					24 Mar 10:24	
Plumas District Hospital		Open					24 Mar 11:35	

Pop ups

After logging into the system, a pop up window may appear as a way of notification of System wide announcements. The message will appear in what is called a “thick box”. There is also an audible reminder to acknowledge the message. Click on “Acknowledge” to read message and navigate on the page.

Updating Hospital Status

You may change your hospital's current status at any time. Changing the status is very simple and only takes a few steps to complete:

1. On any view, locate your hospital's name.
2. Make sure that there is the “key” icon  next to your hospital's name. If the key is present, then you have the appropriate rights to make update the status. If there is no key present, see your local administrator for help.
3. Click on the current status.
4. A new window will open. This window contains the available statuses.
5. Click on the radio box that is located to the left of the desired status.
6. Some statuses require you to choose a reason that will be listed below it. Choose the most appropriate reason by clicking the appropriate radio box.
7. Type any comments that you would like associated with the status.
8. Click the save button. Review your status change to ensure it is correct.

Resource Status Coding

Depending on the resource being tracked (Hospital Emergency Department, Trauma Center, Air Ambulance, etc.), the status coding options will be different. These options are preset and the user is only able to select from the status list associated with the resource type.

Hospital Emergency Department Status

- **Open** – A general warning of pending resource limitation and implementation of the hospital diversion avoidance policy.
- **Closed** – Closed to all ambulance traffic including immediate patients. This occurs when an “Internal Hospital Disaster” has been declared.
- **Diversion** – Closed to ambulance traffic except for immediate (unstable) patients.
- **Diversion Override** – ONLY APPLICABLE IN WESTERN SHASTA COUNTY. When both WSC facilities are requesting Diversion/Resource Alert status for the same criteria concurrently.
- **Divert w/Res Alert** – This is where ED resources are saturated and there is a Reduction in Trauma Services. This will Trigger the “Hospital Status Change – Authorization Form.”
- **Open** – Open to all patients.
- **Open_Overdue** – An automatic update to alert that the hospital status is expired.
- **Resource Alert** – Reduction in Trauma Services; complete hospital services are not available. Specific limitations shall be documented in EMResource comments.
- **Update Alert** – An automatic update to alert that the current hospital status will expire in ½ hour.

Air Medical

- **Available** – Service is available.
- **Unavailable** – Service is not available.

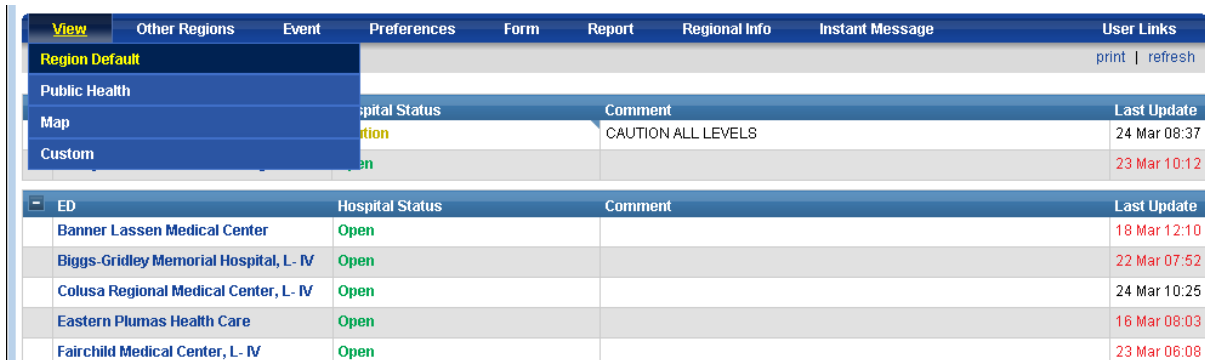

Navigating the Site

After you have logged in, the first page that you are taken to is determined by provider type and location. The default for most users will be the “Custom” view or “Regional” view. In the Regional View you will see information on hospital and trauma center statuses by zone or county, as well as EMS air resource statuses.

“Mouse Over” Navigation

In version 3, most of the navigational main menu items are enabled so that the associated sub menu dropdowns appear once the mouse is hovering over the item. There is no need to click your mouse to see the selections.

View Tab

The screenshot shows the EMResource user interface. At the top, there is a navigation bar with tabs: View, Other Regions, Event, Preferences, Form, Report, Regional Info, Instant Message, and User Links. The 'View' tab is active, and a dropdown menu is open, showing options: Region Default, Public Health, Map, and Custom. Below the dropdown, there is a table with columns: Hospital Status, Comment, and Last Update. The table lists several hospitals with their status (Open) and last update times.

Hospital Status	Comment	Last Update
Open		24 Mar 08:37
Open	CAUTION ALL LEVELS	23 Mar 10:12
ED		
Hospital Status	Comment	Last Update
Banner Lassen Medical Center	Open	18 Mar 12:10
Biggs-Gridley Memorial Hospital, L- IV	Open	22 Mar 07:52
Colusa Regional Medical Center, L- IV	Open	24 Mar 10:25
Eastern Plumas Health Care	Open	16 Mar 08:03
Fairchild Medical Center, L- IV	Open	23 Mar 06:08

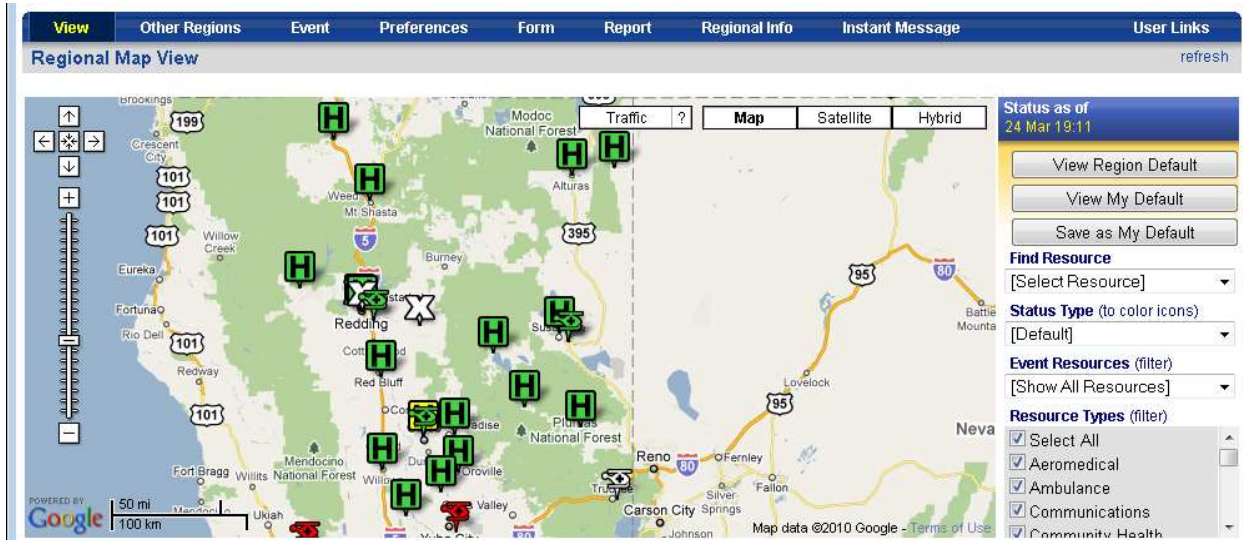

The view tab allows users to select between various views of system resources. This view is changeable by selecting from the sub groups: Regional Default, Map View, Custom View, or county-specific views. Most views contain the resource name, resource status, status type, any comments associated with the current status, and when the resource status was last updated.

Region Default View

This view contains a complete list of all hospital resources and air medical resources tracked by EMResource. Blue dividers separate each county or zone

for hospital resources, and air medical resources are listed at the bottom of the page.

Map View

The map view depicts system resources on a map, as well as the color-coded status and type of resource. Clicking on a resource icon will display the name of the resource and permit the user to view contact information for the resource. This map can be customized by modifying any of the screen defaults shown to the right of the screen.

County Views

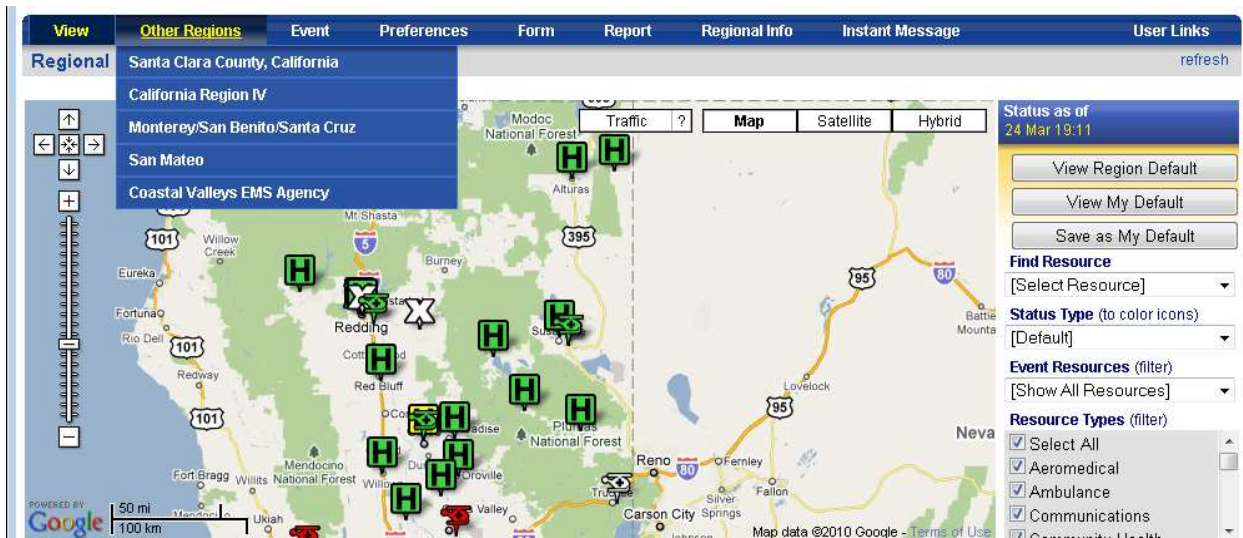

In the County Views, system resources selected by the county are displayed.

Custom View

The Custom View allows the user to select the resources to be displayed.

Other Region Tab

The other region tab will take you to a view that currently shows hospital status information for EMResource regions including: Monterey/San Benito/Santa Cruz, Santa Clara County, Region IV, San Mateo, Coastal Valleys, and Nevada. Users should note that diversion colors in other counties may not hold the same meanings or census as your current county. Additional regions may be added in the future.

Event Tab

View	Other Regions	Event	Preferences	Form	Report	Regional Info	Instant Message
View Menu		Event Management					
Menu Option		Event Setup					
Region Default		Event List					
Public Health							
Map						View resource status on a regional map.	
Custom						View your personal status view.	

The event tab allows certain users to initiate, manage, or update events (i.e. MCI, system alerts, hospital queries, and regional messages). Not all users have access to this tab; therefore, this item may not appear on your menu. Please see your local administrator for more information.

Preferences Tab

Setup	View	Other Regions	Event	Preferences	Report	Form	Regional Info	Instant Message
Preferences Menu				Event Notification				
				Status Change Prefs				
Menu Option	Description			Change Password				
Event Notification	Administer event			Customized View				
Status Change Prefs	Administer status			User Info				
Change Password	Change your password							
Customized View	Configure your personal view							
User Info	Maintain your user profile							

Copyright © 1998-2008 EMSysystem, LLC EMResource © Version 3.6 Build 3526

The preference tab allows users to change items such as:

- event notification methods,
- preferences for notification of resource status changes,
- changing password for login,
- creating a customized view, and
- updating user information.

One word of caution, when modifying the event notification and status change preferences, try to stay on the conservative side when setting up notifications to pagers or cell phones. The volume of text messages that will be sent to your device could be quite large if you choose to be notified of every status change or event notification.

Report Tab

View	Other Regions	Event	Preferences	Form	Report	Regional Info	Instant Message
Report Menu					Status Reports		
					Event Reports		
Menu Option	Description						
Status Reports	Access historical data for resources tracked on a daily basis						
Event Reports	Display all information associated with a specific set of events						

Mobile View | [Terms & Conditions](#) EMResource © Version 3.10 Build 4763

The report tab allows users to generate reports on status changes, events, and forms. All reports are modifiable as per date ranges, resources, or type of events.

Form Tab

View	Other Regions	Event	Preferences	Form	Report	Regional Info	Instant Message
Form Menu				Activate Forms			
				Pending Forms			
Menu Option	Description						
Activate Forms	Fill out a form, or send one to another user to be filled out.						
Pending Forms	View your forms to fill out						

[Mobile View](#) | [Terms & Conditions](#)

EMResource © Version 3.10 Build 4763

The form tab allows certain users to activate forms, such as Messages to Users/Hospitals, and MCI Patient Dispersal Form. Not all users will see these options on their menu. Additional forms may be added in the future such as Syndromic Surveillance tools, etc.

Regional Information Tab

Setup	View	Other Regions	Event	Preferences	Report	Form	Regional Info	Instant Message
Regional Info Menu							Calendar	
							Protocol/Document	
Menu Option	Description							
Calendar	Access the regional calendar							
Protocol/Document	Post and view documents							

The regional information tab allows users to view scheduled events, as well as download and view various protocols and documents regarding system operations.

Instant Messaging Tab

EMResource enables its clients to instantly interact with other system users via the Instant Messaging function. This messaging function can instantly send messages from one computer to another, and is similar to other web-based chat rooms. The Instant Messaging feature lets the client know when another EMResource user is logged on and capable of receiving and sending messages. This feature can be used as a one-to-one communications medium, or can be utilized to allow multiple users to interact at the same time when using the “conference” option.

Creating an MCI Event

a. Select “Event” on the EMResource menu

View	Other Regions	Event	Preferences	Form	Report	Regional Info	Instant Message
Event Menu							
Menu Option	Description						
Event Management	Use templates to create events as they occur.						
Event Setup	Predefine the information you would like to collect during an event.						
Event List	View list of ongoing and recently ended events.						

b. Select “Event Management”
 c. Select “Create New Event”

View	Other Regions	Event	Preferences	Form	Report	Regional Info	Instant Message
Event Management							
<input type="button" value="Create New Event"/>							
Action	Icon	Status	Start	End	Title	Drill	Template
There are no ongoing or planned events in this region.							

d. Select “Create” Note: Select Create MCI Event

Create		Incident Command Structure	Infrastructure	Use this template when you wish to find out if hospitals have activated their Incident Command Structure.
Create		Mass Casualty Incident	Rescue	Queries for MCI category capacity.
Create		NDMS Bed Poll	Infrastructure	Use this to query for NDMS inpatient bed capacity
Create		Public Health ICS	Infrastructure	Use this event when you want to query public health and their ICS
Create		Regional Announcement	Other	Use to distribute information to regional users.

e. Enter the Title for the MCI, beginning with the Control Facility's initials, followed by the Incident Name given by field personnel (e.g. CSU, Chico: HWY32/West 1st Avenue).

**** indicates the information is required.**

Title:**

Information:**

f. Enter Information for this Event, including:
 a. Location

- b. Type of incident (trauma, medical, hazmat)
 - c. Approximate number of victims
 - d. Request for Emergency Department Status
- g. Select Receiving Facilities to include in MCI Notification and Assessment, and “Save” the event. If Receiving Facilities are being utilized for another Event, make contact with other Control Facilities as needed to coordinate patient dispersal. If more facilities are needed than those listed in EMResource (outside the region), contact the MHOAC to coordinate inter-region patient dispersal with the RDMHC/S as needed.

<input type="checkbox"/> Resource Name ▲
<input type="checkbox"/> Banner Lassen Medical Center
<input type="checkbox"/> Biggs-Gridley Memorial Hospital, L- IV
<input type="checkbox"/> Colusa Regional Medical Center, L- IV
<input type="checkbox"/> Eastern Plumas Health Care
<input checked="" type="checkbox"/> Enloe Medical Center
<input type="checkbox"/> Fairchild Medical Center, L- IV
<input checked="" type="checkbox"/> Feather River Hospital

- h. Update the Event any time new information is received, including total patients by triage category, patient destinations, etc.

Title:** ** indicates the information is required.

Information:**

- i. Return to the “View” screen on EMResource, and click the link entitled “click here” next to the Event name on the colored bar to monitor the Receiving Facility capacity reports (see diagram below).

Address <https://www1.emssystem.com/EMSystem> Go

UCD - I80 and I 5, by UCDAVIS MC @12-Oct-2006 15:32

4 medics enroute

Zone 1 (Sacramento)	1. Immediate	2. Delayed	3. Minor	4. Decon Facility	5. Surgeon Availability	Facility Status	Comment	Last Update	By User
Kaiser South	0	0	2	Yes	No	Diversion		12-Oct-2006 15:37	Kaiser South
Methodist Hospital	0	0	5	Yes	No	Open		12-Oct-2006 15:35	Methodist Hospital
Sutter General	0	2	10	Yes	No	Open		12-Oct-2006 15:40	Sutter General
Summary	0	2	17	II/A	II/A	II/A	II/A	II/A	II/A

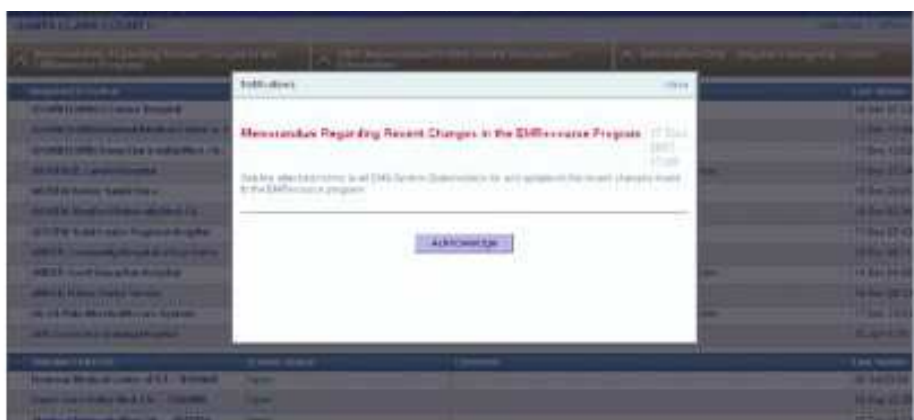

Ending a MCI Event

After providing the final summary of the Event (approximately 5 minutes), the Control Facility shall end the event, by selecting “Event” from the main menu, selecting “Event Management” and clicking “End” next to the displayed event.

Responding to MCI Messages

1. Acknowledge MCI Message

An MCI Event is created by the Control Facility in order to assess the Receiving Facility’s ability to receive patients. Each Receiving Facility that is selected by the Control Facility to participate in the MCI Event will receive an audio message of “MCI Alert,” and a pop-up screen on EMResource with a prompt to “Acknowledge” the message. (see diagram below)

The MCI Event name will appear on a colored bar near the top of the EMResource “View” screen. A corresponding icon will appear next to each facility that has been selected to participate in the Emergency Department assessment. To see details of the Event, simply click the link next to the Event name entitled “click here” (see diagram below).

🚒 Drill: DRILL: test (click here)

2. Enter Facility Capacity

Drill: DRILL: test by Doug Buchanan @18-Sep-2006 12:54									
Please disregard. This is only a test.									
Stanislaus	1. Immediate	2. Delayed	3. Minor	4. Decon Facility	5. Surgeon Availability	Facility Status	Comment	Last Update	By User
Stanislaus Level II TC Destination	0	0	0	No Status	No Status	Open		18-Sep-2006 08:34	Stanislaus Control

Enter the Facility Capacity in EMResource for: Immediate, Delayed, and Minor (see diagram below) within 5 minutes of the request.

3. Notify Charge Nurse of the Event.
4. Relay incoming patient information to Receiving Facility Teams as necessary.
5. Update Facility Status and Capacity as requested or as resources change.

HAvBED Poll

A poll of the facilities' ability to accept inpatients may be conducted in response to a local, regional, statewide, or national event. HAvBED Polls will normally come from a Control Facility, either within the county for a local event or from another Control Facility within the region. If the request for Inpatient Bed capacity is in response to an area outside the region, the request will come from the Regional Disaster Medical Health Coordinator (RDMHC) or designee.

1. Select "Event" on the EMResource menu

View	Other Regions	Event	Preferences	Form	Report	Regional Info	Instant Message
Event Menu							
Menu Option	Description						
Event Management	Use templates to create events as they occur.						
Event Setup	Predefine the information you would like to collect during an event.						
Event List	View list of ongoing and recently ended events.						

2. Select "Event Management"
3. Select "Create New Event"
4. Select "HAvBED Poll"

Create		HAvBed	HAvBED	Use this template when querying for HAvBed information.
Create		HHS HAvBed Projections	HAvBED	This will be used when asking hospitals for 24 hour and 72 hour HAvBed projections
Create		HHS Situational Assessment	HAvBED	This event template will be used for a HHS Situational Assessment.
Create		Incident Command Structure	Infrastructure	Use this template when you wish to find out if hospitals have activated their Incident Command Structure.
Create		Mass Casualty Incident	Rescue	Queries for MCI category capacity.

5. Enter the Title for the HAvBED Poll, beginning with the Control Facility's initials (e.g. SCCF: Northern California Flood)
 - a. Enter Information for this Event, including:
 - b. Location
 - c. Type of incident (trauma, medical, hazmat)
 - d. Approximate number of victims
 - e. Request Inpatient Status
6. Select Receiving Facilities to be included in Inpatient Bed Assessment, and "Save" the event. If Receiving Facilities are being utilized for another Event, make contact with other Control Facilities as needed to coordinate patient dispersal. If Receiving Facilities are needed outside of the OES Region, contact the MHOAC to coordinate inter-region patient dispersal with the RDMHC/S as needed.
7. Return to the "View" screen on EMResource, and click the link entitled "click here" next to the Event name on the colored bar to monitor the Receiving Facility capacity reports.

Regional/OA Announcement

An Operational Area or Regional Announcement is an event within EMResource that allows for the notification of any number of facilities. Announcements may be made by the RDMHC, a local Public Health Department, EMS Agency, or Control Facility.

Examples of Announcements might include: Information regarding a Hazardous Materials Spill; Incident Information from a local, regional, or statewide Public Health warning. Creating a Regional Announcement Event is much like creating an MCI Event.

1. Select "Event" on the EMResource menu

2. Select "Event Management"
3. Select "Create"
4. Select OA Announcement

5. Enter the Title for the Announcement, beginning with the Control Facility's initials (e.g. SJGH: Public Health Alert)
6. Enter Information for the Regional Announcement message.
NOTE: All Events default to start at the current date and time and end in 24 hours.
7. Select Receiving Facilities to include in Notification, and "Save" the event.
8. Return to View screen. A green event bar will display with an icon next to each facility selected to receive the announcement.

User Preferences

User info/ Notification Settings

The user info section allows you to update or modify personal contact information, and enter information on where system notifications are to be sent. There are two categories in which notification methods are grouped: (1) email addresses and (2) text pager addresses. Please note that because of limitations of the system, all items must be entered as an email address. Most text enabled devices such as cell phones and text pagers have an associated email address in which messages may be sent. See your device's service provider for this information.

To change your user information:

1. Click on the Preference tab
2. Click on User Info

Setup	View	Other Regions	Event	Preferences	Form	Report	Regional Info	Instant Message
Preferences Menu				Event Notification				
Menu Option ▼				Status Change Prefs				
Event Notification				Change Password				
Status Change Prefs				Customized View				
Change Password				User Info				
Customized View				Configure your personal status view.				
User Info				Maintain your user profile				

3. Enter your full name (first and last)
4. Enter the name of your organization
5. Enter you contact phone number
6. Enter email addresses in which you would like notifications to be sent. Please use a comma to separate multiple addresses.
7. Enter the email address of text pagers or other text capable devices in which you would like notification to be sent. Please use a comma to separate multiple addresses.

8. Choose your default view from the drop down list.

Update User Info

** indicates the information is required.

Full Name:**

First Name:

Middle Name:

Opt Out of User Info Reminders: Check to NOT receive reminder e-mails.

Receive expired status notifications: E-Mail Pager

Type	All Notifications	Include Resource Summary	At All Times	Exclude Time Range	From	To
E-mail	<input type="radio"/> On <input checked="" type="radio"/> Off	<input type="checkbox"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="text"/> : <input type="text"/>	<input type="text"/> : <input type="text"/>
Text Pager	<input type="radio"/> On <input checked="" type="radio"/> Off	<input type="checkbox"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="text"/> : <input type="text"/>	<input type="text"/> : <input type="text"/>
Web Page	<input checked="" type="radio"/> On <input type="radio"/> Off		<input checked="" type="radio"/>	<input type="radio"/>	<input type="text"/> : <input type="text"/>	<input type="text"/> : <input type="text"/>

Utilizing the user info sub menu, you may also set up which method will be used to notify you of alerts and queries as they are initiated or updated. The notification methods consist of email, text pager (or other text messaging device) and web page. System users should always keep the web page notification active, and “checked”, in the alerting options. One or any combination of these methods can be utilized for each event type.

To activate a particular method for each event type:

1. Click on the Preference Tab
2. Click on User Info
3. Locate the type of event in which you would like to be notified
4. Click on the radio box that is to the left of the notification method you wish to be used for that particular event.

- Boxes with a check mark will then be activated once the “save” button is clicked.

To deactivate a method just do the same as above, click on the method’s radio box so that it is empty, and then click on the “save” button.

Status Change Preferences

The Status Change Preferences view allows the user to change their notification preferences. The Status Change Preference List displays a detailed view of county resources, and the method in which the system will notify the user, once the status of the resource changes.

My Status Change Preferences						
Add						
Amador						
Action	Resource	Status Type	Status	E-Mail	Text	Web
edit delete notifications	Sutter Amador	Facility Status	Internal Dis/ Closed		X	
Calaveras						
Action	Resource	Status Type	Status	E-Mail	Text	Web
edit delete notifications	Mark Twain St. Joseph's	Facility Status	Internal Dis/ Closed		X	

From the Status Change Preference List screen, the option to edit box is located in the low left corner of the screen. To change a notification item, the user simply clicks on the “+” located next to the selected item.

+ HAVBed									

Once selected, there will be a box enabling the user to choose from one of several availability or operational statuses. After all sub category box options are made, the user then selects the method by which EMResource will notify the

user where there is a change of the selected items status. When preferences are set, the user clicks on the save button to save all changes made.

Change Password

User passwords must be a minimum of 6 characters in length and must contain at least one number (i.e. ABCDE1). Passwords are case sensitive, so be sure to enter the password exactly as you set it up or you will receive an error message.

To change your password:

1. Click on change password.
2. Type in your current password and your new password.
3. You must confirm your new password by re-typing it in.
4. Then click on the “save” button to initiate your new password.

Setup	View	Other Regions	Event	Preferences	Form	Report	Regional Info	Instant Message
Change Password								
(Passwords must be at least 6 characters and include a number) <small>** indicates the information is required.</small>								
Current Password: ** <input type="text"/>								
New Password: ** <input type="text"/>								
Confirm New Password: ** <input type="text"/>								
<input type="button" value="Save"/>								

If for some reason you cannot remember your password, contact your local system administrator and they can reset your password. If you have your password reset, the system administrator will provide you with a default password, and on your next login attempt you will be prompted to change your password from the default.

Customized View

The customized view section allows users to update or modify their default view to include facilities inside and outside their region.

To customize your view:

1. Click on the Preferences tab, and then click customized view.
2. Click on “Add More Resources” button.

Remove - will be removed from view (0)

Enter New Section Name

Make this custom view my default view

3. To narrow your search, click on the category drop down menu to select the facility type you are looking for (e.g. Hospital).

Reports

Status Reports

The status report tracks daily status changes for the hospital emergency departments as well as the trauma centers. Reports can either be in summary form, showing just the totals generated over a selected time period, or in detail form which shows every change, comments associated with the change, and the time duration in which the change was in effect. Another option is a status snapshot report. You can view a snapshot of the EMResource screen for any given time on any given day in the past.

To run a “Status Snapshot” report:

1. Click on the “Report” tab. You will be taken to a new screen.
2. Select “Status Reports” from the sub navigation menu.
3. Choose “Status Snapshot” from the list of available reports.

View	Other Regions	Event	Preferences	Form	Report	Regional Info	Instant Message
Status Reports Menu							
Menu Option	Description						
Status Snapshot	This report displays the resource view of the region for a specific date and time.						

4. A new screen will be opened.

5. Enter the date by either keying it in (mm/dd/yyyy) or by clicking on the calendar icon . Clicking on the icon will open a popup window, which will display a calendar, in which you may choose the date.
6. Enter the hour and minutes by clicking on the drop down arrow.
7. Choose the format you would like the report in (i.e. Web HTML).
8. Click on the “Generate Report” button.

9. A new window will open. Your report data will appear on this new window once it is compiled.
10. You may now save, print, or just view your snapshot report.

To run an “Event Detail” report:

1. Click on the “Report” tab.
2. Select “Event Reports” from the sub navigation menu.
3. Choose “Event Detail” from the list.

Menu Option	Description
Event Detail	This report displays all information associated with an indicated event.
Event Snapshot	This report displays the event view for a single event as it appeared on a specific date and time.

4. A new screen will be opened.
5. Enter the beginning date for the date range by either keying it in (mm/dd/yyyy) or by clicking on the calendar icon . Clicking on the icon will open a

popup window, which will display a calendar, in which you may choose the beginning date.

6. Enter the end date for the date range by either keying it in (mm/dd/yyyy) or by clicking on the  and choosing the date.
7. Choose the event template(s) in which you would like to include into the report by clicking on the radio box that is to the left of the template name. A checkmark indicates that a template has been selected.

Activating Form

Sending Message to Users/Hospitals

To activate, click on the “fill form” button, and provide the information in the appropriate boxes. After all information is entered, click the “send form” button.

MCI Patient Dispersal

The Control Facility notifies the Receiving Facility of incoming patient by clicking on the “Forms” menu option on EMResource, then selecting “Activate Form.”

Setup View Other Regions Event Preferences Report Form Regional Info Insta

Activate Form | Form Notification |

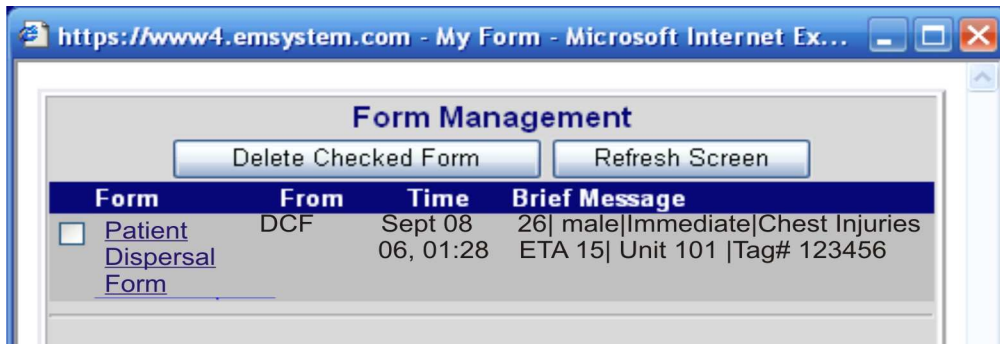

Menu Description	
Activate Form	Activate forms(s) to other users
Form Notification	Configure web notification settings and complete outstanding questionnaire(s)

- 1) Select “Fill Form” for MCI Patient Dispersal, Select the facility, then click “Activate Form.”
- 2) Complete applicable portions of the form, and then click “Send Form,” including:

- (i) Age / Gender
- (ii) Triage Category / Injury
- (iii) ETA (minutes)/ Transport Unit
- (iv) Triage Tag Number
- (v) their Comments

3) MCI Patient Dispersal notification is received with an accompanying audio alert of “Incoming Message.” Facilities receiving this pop-up screen message should:

- Print the Form
- Delete the Form by clicking the white box to the left of the form, and clicking “Delete Checked Form.” If the window is closed without deleting the checked form, the window will reappear in a few seconds accompanied by the audio alert.
- Assign the incoming patient to the appropriate team

Regional Information

Calendar

The calendar feature allows messages to be sorted by date of events that are posted by the EMResource Administrator.

Protocol/Document

The protocols and documents section of EMResource is a virtual library of documentation posted by the EMResource Administrator. Here you will find bulletins, procedure change notices, various forms, protocols and user guides. Most items are in PDF form so you will need Acrobat Reader to open the files.

Find Resources

The find resources feature allows you to search for resources by name, category and/or location.

Calendar	View the regional calendar						
Protocol/Document	View the regional document library						
Find Resources	Search for Resources by name, category and/or location						

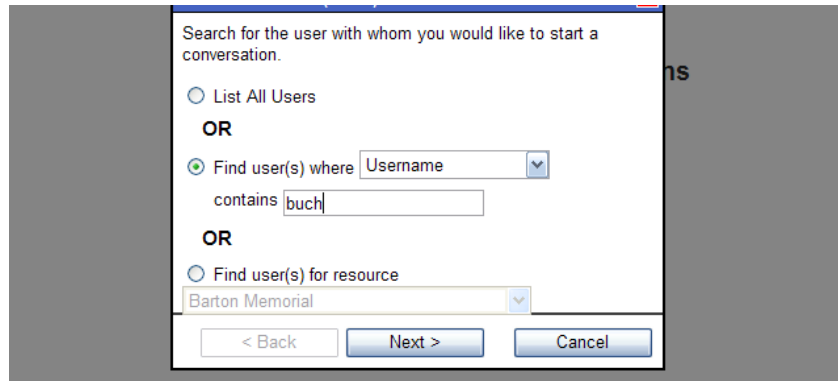

Instant Messaging

Establishing Communication via Instant Messaging

To activate the Instant Messaging function, the user simply clicks on the Instant Messaging tab located in the EMResource's Navigation toolbar. Once the user executes the Instant Messaging option, they can choose between a private communication with another single user by selecting New Private Chat, or create a "chat room" enabling multiple users to communicate by selecting New Conference.

To communicate with a single user:

1. Click on the New Private Chat tab at the lower left site of the screen.
2. From the Create New Chat box, the user can choose to list all EMResource clients or search for a specific user. When searching for a specific user name can be simplified by narrowing the search parameters using the drop down menu and entering part of the user name or resource.

3. After selecting the search option, click on the Next button to continue.
4. The EMResource users that are able to communicate through the chat option will be highlighted in green, indicating they are currently logged in.
5. Instant Messaging begins once the client selects a user highlighted in green and clicks on the Create Chat button.

Creating a Conference Chat:

When establishing a Conference Chat, or a chat room where multiple users can communicate with each other, the user selects the New Conference button located at the lower left side of the Instant Messaging prompt screen. Creating a new conference will entail establishing a name for the new room as well as a description or theme of conversation that will take place in that conference room.

1. After the user inputs the conference room information, the multiple user chat room will be created after clicking on the Create Conference button.
2. Once the conference room is created, the user has the ability to invite other users to the room via the Invite button. When activated, the user can then choose to invite system users to the room by the same search criteria as shown in the Communicating with a Single User section above.

EMResource Trouble Shooting

Trouble Shooting

1. If you experience problems with EMSystem, shut down all instances of your browser (Netscape, Internet Explorer) and then re-start and log into EMSystem again.
2. If you are still unable to get EMSystem to work properly, log out of your computer entirely & shut it down. Wait 2 minutes and then restart the computer and log in to EMSystem.
3. If you are unable to access the website, please check with your facility's tech support to make sure that your Internet connection is available.
4. If you still cannot get into EMSystem, or it doesn't appear to be working correctly, contact your EMSystem administrator and please have the following information readily available: your name, your facility, your EMSystem login name, a detailed description of your problem (including the exact text of any error messages), how long EMSystem has not been working, and a contact name for your facility.
5. As needed, your EMSystem Administrator will contact EMSystem.com and open a support issue.

Getting Help

The following is the normal procedure for getting help with EMSystem issues.

1. If you have questions on how to use EMSystem, please consult others in your department who may be familiar with the program.
2. If your problems are technical in nature, please contact the technical support team at your facility. If they are unable to remedy your problem, then you should contact your EMSystem Administrator.
3. The EMSystem Administrator will contact EMSystem directly and have a tech support representative call you as soon as possible.

EMSystem Administrator Contacts:
